The applicant may, le 66.2(d).  companied, where applie of the amendments, see to submit amendments, to consider amendment with the examiner, see the liminary examination real preliminary	propriate, by amendme e Rules 66.8 and 66.9. see Rule 66.4. s and/or arguments, see the Rule 66.6.	ents, according to Rule 66.3.  Rule 66.4bis.  on the basis of this opinion.
VII Certain defects in the interaction.  VIII Certain observations on the Certain Observations, see Ru How? By submitting a written reply For the form and the language Also For an additional opportunity For the examiner's obligation For an informal communication. If no reply is filed, the international presumment of the Certain Observations of the Certain Observations on the Certain Observation of the Certain Observation of Certain Observations on the Certain Observation Obs	to this opinion.  bove. The applicant may, le 66.2(d).  companied, where applie of the amendments, see to submit amendments, to consider amendment with the examiner, see the liminary examination real preliminary	propriate, by amendment of the Rules 66.8 and 66.9. In see Rule 66.4. In see Rule 66.4. In see Rule 66.6. In see Rule 66.6. In separation of the Rule 66.6. In	ents, according to Rule 66.3.  Rule 66.4bis.  on the basis of this opinion.

## I. Basis of the opinion

The basis of this written opinion is the application as originally filed.

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The question of whether the claimed invention appears to be novel, to involve an inventive step, or to be industrially applicable has not been and will not be the subject of the international preliminary examination in respect of the claims which have not been searched (Article 17(2)(a) or (3) and Rule 66.1(e) PCT; see also international search report).

- V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability
- 1. To the extent that the international preliminary examination has been carried out (see item III above), the following is pointed out:
- 2. In light of the documents cited in the international search report, it is considered that the invention as defined in at least some of the claims, which have been the subject of an international search report, does not appear to meet the criteria mentioned in Article 33(1) PCT, i.e. does not appear to be novel and/or to involve an inventive step (see international search report, in particular the documents cited X and/or Y and corresponding claim references).
- 3. If amendments are filed, the applicant should comply with the requirements of Rule 66.8 PCT and indicate the basis of the amendments in the documents of the application as originally filed (Article 34 (2) (b) PCT) otherwise these amendments may not be taken into consideration for the establishment of the international preliminary examination report. The attention of the applicant is drawn to the fact that if the application contains an unnecessary plurality of independent claims, no examination of any of the claims will be carried out.
- NB: Should the applicant decide to request detailed substantive examination, then an international preliminary examination report will normally be established directly. Exceptionally the examiner may draw up a second written opinion, should this be explicitly requested.
